

## Ceiling Cinema Monitors

In-ceiling speakers have become the preferred solution in many installations. Whether it be a complete in-ceiling surround sound system in a dedicated home theater or a simple stereo application in the master bedroom, in-ceiling speakers offer great performance and are absolutely inconspicuous.

In keeping with Tantra's focus on high-performance, the In-Ceiling Cinema Monitors take this concept to the next level. Featuring tuned and ported enclosures loaded with hand-selected drivers and advanced crossover networks, these speakers are unequalled in situations that demand high sound pressure levels and dramatic sonic accuracy. They are also a perfect complement to the rest of the Tantra line as side and rear channel speakers in advanced surround sound systems.

*Tantra - pure consciousness through pure audio*

## Tantra Ceiling Cinema Monitors

8.1 Ceiling Cinema Monitor

6.1 Ceiling Cinema Monitor
